

O Lord, how manifold are Your works! In wisdom You have made them all. The earth is full of Your possessions

May the glory of the Lord endure forever; may the Lord rejoice in His works. Psalm 104:24, 31

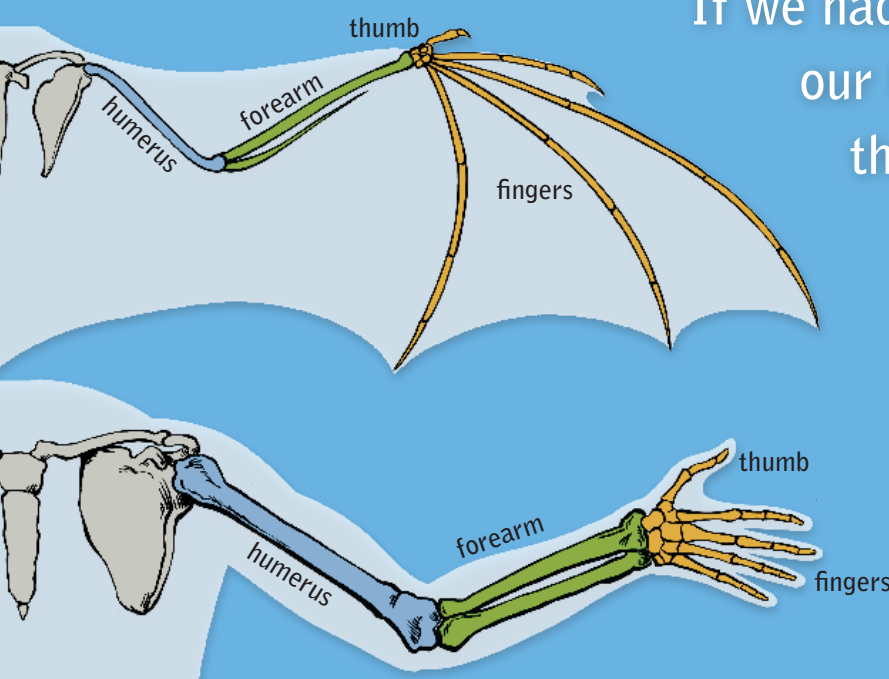

Bats

The Marvelous, Mysterious,
and Often Misunderstood Mammal!

Bats are the only mammals that can fly!

Look at the difference between your hand and
the bat's wing. The bat's fingers are extremely long.

If we had fingers like the bat's,
our fingers would be longer
than our legs and hang
down to the floor!

Bat wings
are like human
hands, but they
don't have empty spaces
between their fingers, like
we do. Instead, leathery skin stretches
between their "fingers." That skin
allows them to fly and change
direction quickly.

Bats have
large, strong muscles
in their backs and
 chests that allow them
to move their wings.

Bats are fun to
watch and learn about.
No need to be scared!
God is revealed in this
uniquely designed, amazing
animal, just as He is in
all of creation!
